

KW810 (BNWAS)

BRIDGE NAVIGATION WATCH ALARM SYSTEM

The purpose of the Bridge Navigation Watch Alarm System (BNWAS) is to ensure that a vessel is under the control of the Officer of the Watch (OOW) at all times and to ensure that the wheelhouse is never unmanned. The OOW must reset the BNWAS within a set time period. The BNWAS is essential for companies running a "one man bridge" operation, where the vessel is reliant on one OOW to ensure the vessel continues on a safe passage. Should the OOW become unable to interact with the BNWAS the system will enter a sequence of alarm stages:

- Stage 1 Audible and visual alarm local to the wheelhouse only
- Stage 2 additional audible and visual alarm in chosen Officer's quarters
- Stage 3 additional audible alarm ship-wide

In addition to the standard "push to reset" controls the KW810 has the option of the KW810-P Motion Sensor. When the sensor detects movement of the OOW it will automatically reset the BNWAS counter, leaving the OOW free to carry out his normal duties without the concern of resetting the BNWAS manually every 3-12 minutes.

The IMO resolution MSC.282(86) (adopted t June 2009) states that the BNWAS will be a mandatory requirement on vessels as follows:

- 1 July 2011 Cargo ships of 150 gross tonnage and greater and all passenger ships, irrespective of size constructed after this date;
- 1 July 2012 Passenger ships irrespective of size constructed before 1 July 2011, not later than 1st survey* after 1 July 2012;
- 1 July 2012 Cargo ships of 3000 gross tonnage and upwards constructed before 1 July 2011, not later than first survey* after 1 July 2010;
- 1 July 2013 Cargo ships of 500 gross tonnage and upwards but less than 3000 gross tonnage constructed befrore 1 July 2011, not later than the first survey* after 1 July 2013;
- 1 July 2014 Cargo ships of 150 gross tonnage and upwards but less than 500 gross tonnage constructed before 1 July 2011, not later than the first survey* after 1 July 2014.

UNITED KINCODOM OF CREAT BRITAIN AND NORTHERN IRELAND
CERTIFICATE OF TYPE APPROVAL

Applicant—
AMM Marine (UK) Itid
Unit 2, Tower Industrial Estate,
Tower Lane, Estatleigh
Hampshire, 5050 6NZ
United Kingdom

This is to certify that the applicant has submitted details of arMarine Bridge Navigational Watch Alarm System (BNWAS)
(Marine Equipment Directive - Commission Directive 2009/26/fc—Term A_2/A_32)
Of system type known and designated as:

AMM Marine - KW33 BWW3.

(Comprising component parts and having the thirties A box Marinestics shown in shedule 1)
and that this has been tested and assected units where indicated in a commission of component parts as of having technical contact and the commission of the component parts and having technical contact and the commission of the component parts and having technical contact and the commission of component parts as of the commission of the component parts as the commission of the component parts and having technical contact and the commission of component parts as the commission of the component parts and having technical commission of component parts as the commission of the component parts and having the component parts of the commission of the component parts and having the component parts and having the component parts of the commission of the component parts of the commission of the component parts of Recolution A694[17].

KW810 (BNWAS)

SPECIFICATIONS

MAIN ELECTRONICS UNIT (MEU)

Power: 110 / 220 VAC

Input 1: NMEA0183 GPS Speed \$GPVTG

Input 2: NMEA0183 Autopilot or Autopilot Engaged

Output: NMEA0183 for VDR

Dimensions: Mild steel enclosure 300 x 300 x 155mm IP57

MAIN ALERT PANEL (MAP)

Power: 12VDC

Input: All Alert stages and Audible Alarm

Dimensions: ABS Moulded plastic 135 x 185 x 85mm IP65.

REMOTE ALERT PANEL (RAP)

Power: 12VDC

Input: Bridge Alert and Audible Alarm

Dimensions: ABS Moulded plastic 120 x 90 x 50mm IP65.

WATCH ALERT PANEL (WAP)
FOR 2ND & 3RD STAGE ALERTS

Power: 12VDC

Input: Watch Alert and Audible Alarm

Dimensions: ABS Moulded plastic 120 x 90 x 50mm IP65.

MOTION SENSOR (PIR)

Power: 12v DC

ADDITIONAL OUTPUTS

3 x Dry Contacts for: 3rd Stage Active Watch Alarm for General Ship Alarm.

4th Stage for activating SSAS Distress system

System Faults.

APPROVALS:
