

Anschütz Autopilots are installed on more than 9,000 ships

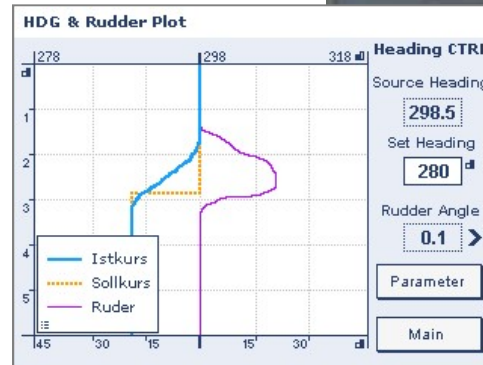

Offers high precision steering, based on +80 years of autopilot know-how!

Accurate course keeping helps to reduce hull drag and resistance,
→ Direct effect on fuel consumption!

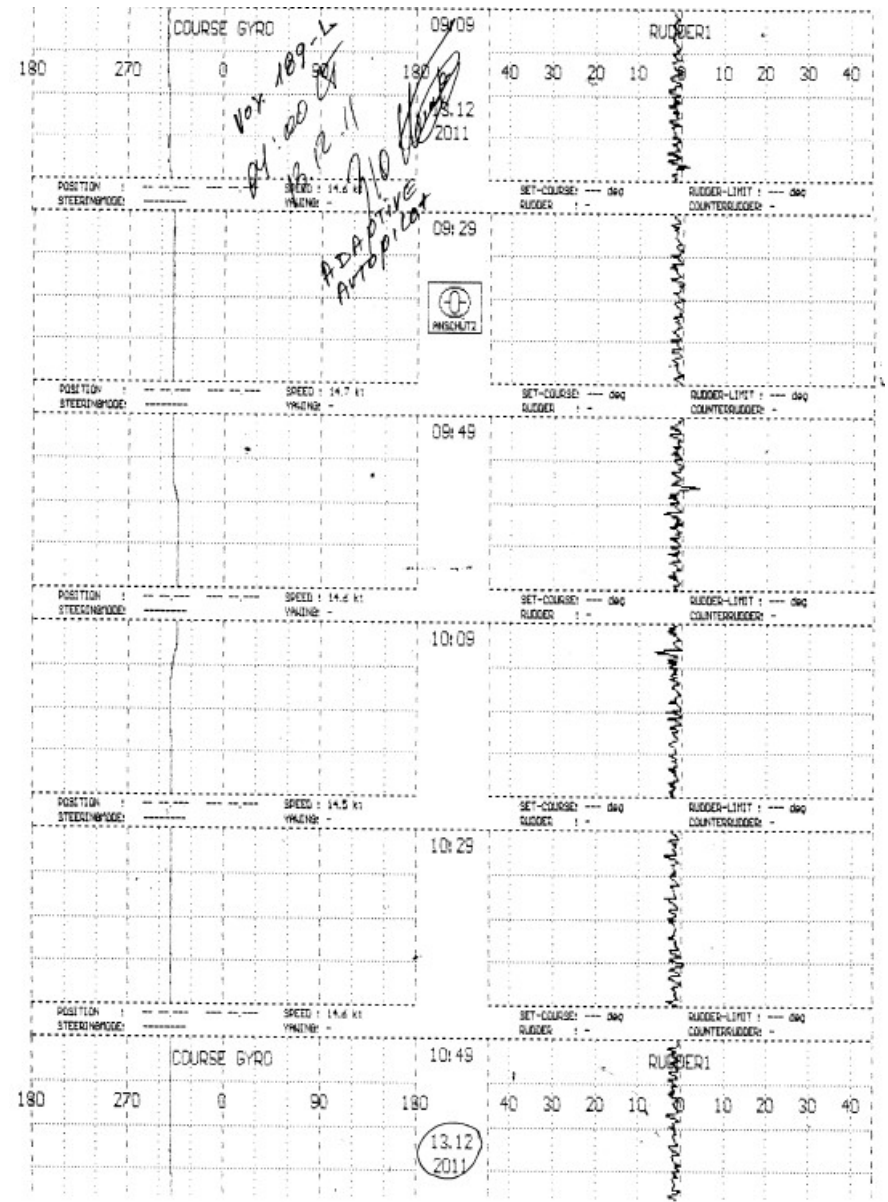

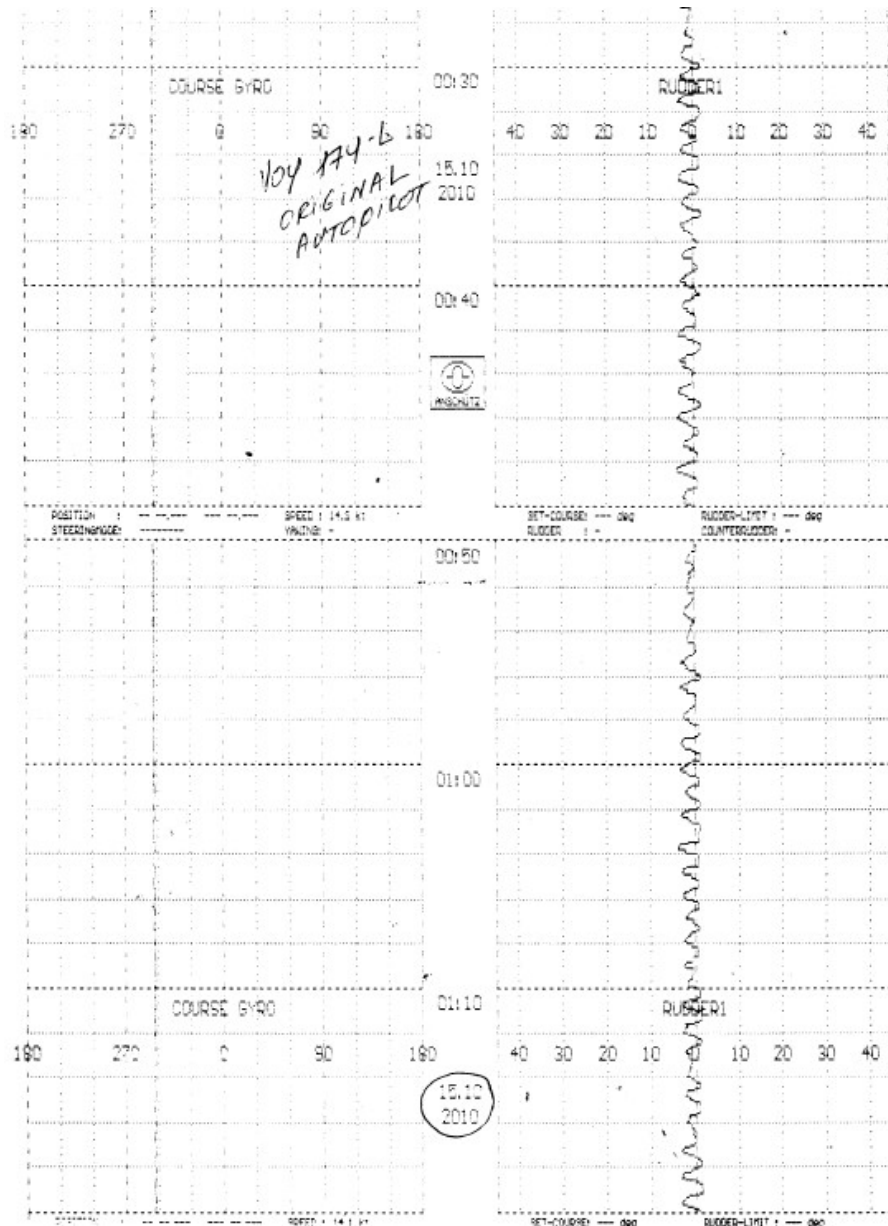

Safe, reliable and improved fuel efficiency

- TFT colour display with touch screen, intuitive operation, easy access sub-menus
- Superior steering algorithm
- Graphic heading and rudder plot screen → instantaneous visual feedback on effect of parameter change
- Course Control mode (drift corrected heading control)
- Acceleration Monitor (helps to avoid damages due to high RoT)
- no separate connection unit needed, all functions built into operator unit
- **Improved fuel efficiency! 0,3 to 0,5% savings**

Old vs New adaptive NP 5000 Autopilot

Less rudder activity → fuel savings!
